

IQS SYSTEMS
Making metal work for you

MAKING METAL WORK FOR YOU

- Delivering turnkey projects
- High quality and accuracy is our SOP
- On time delivery is our forte

WHO WE ARE

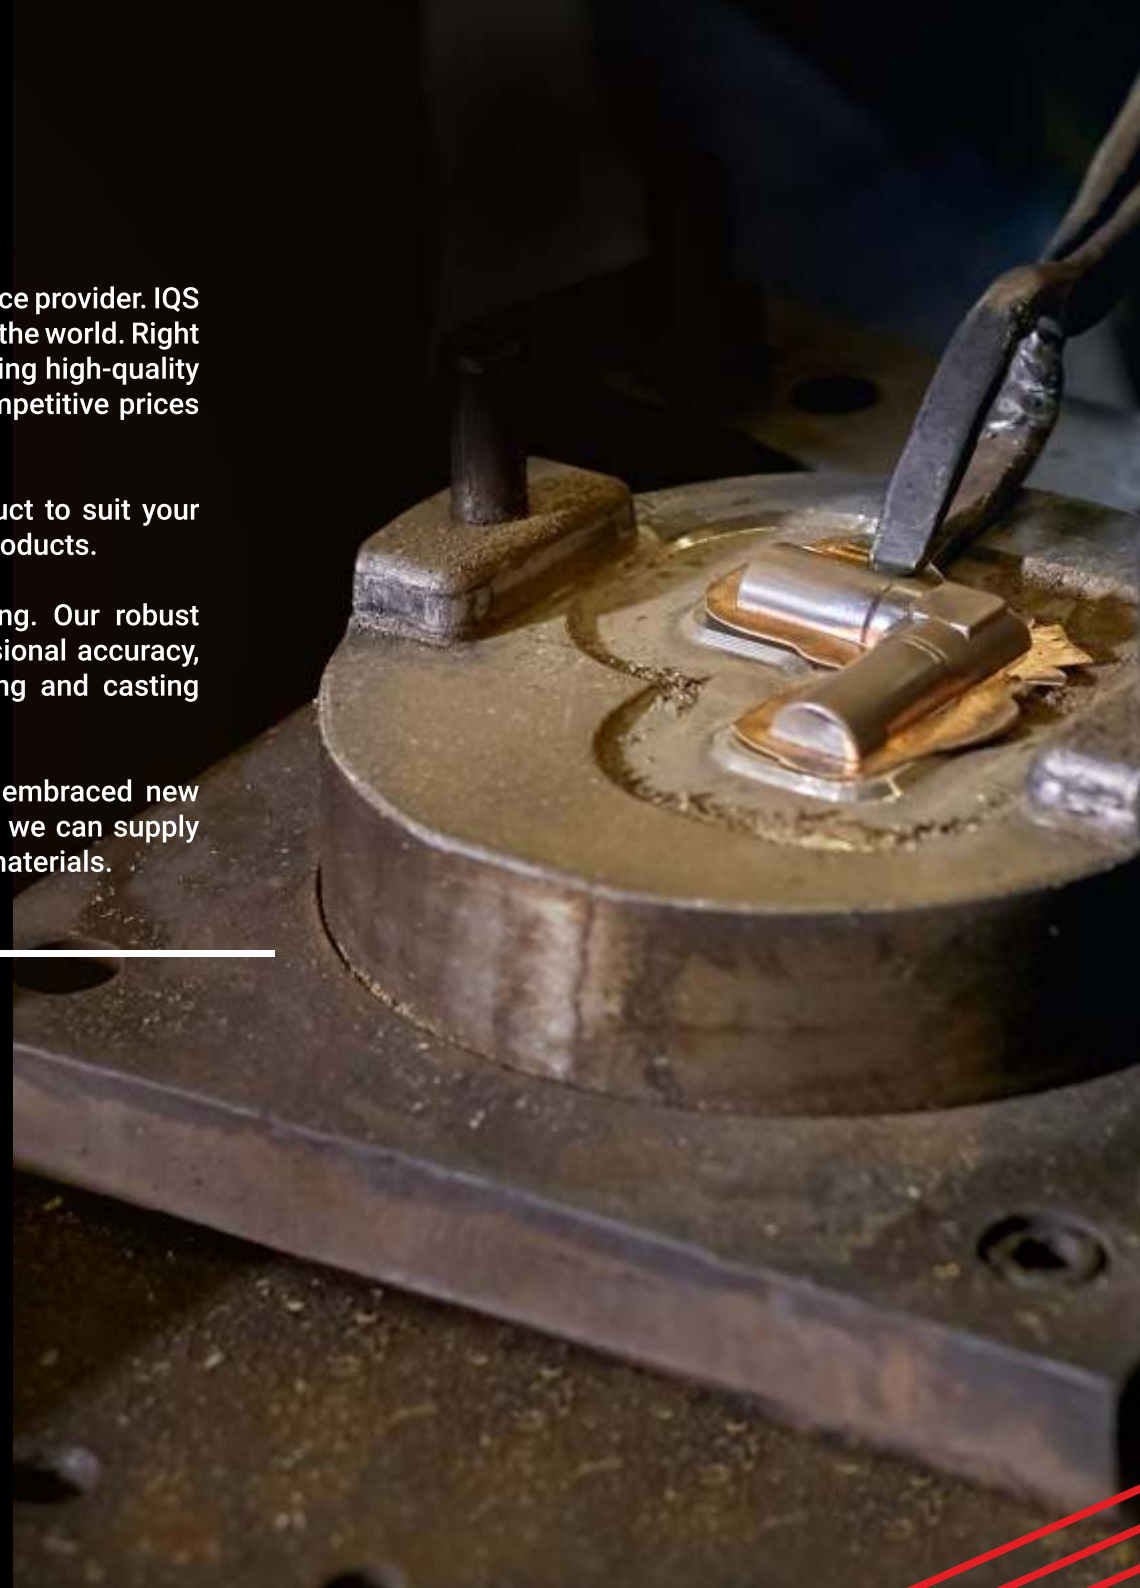

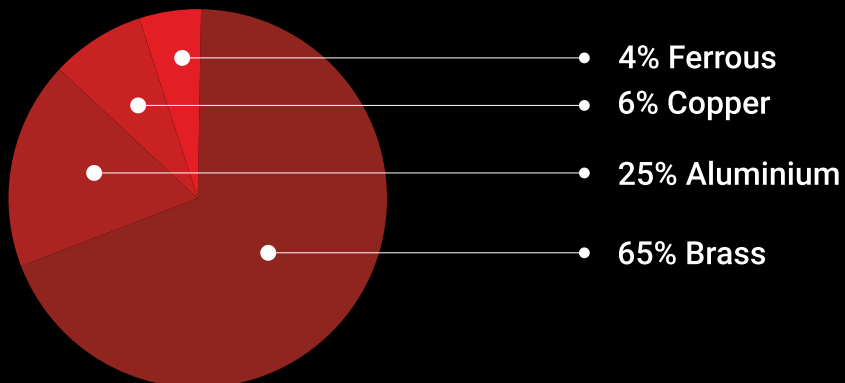

IQS System is a fully-integrated ISO 9001:2015 certified manufacturing service provider. IQS SYSTEMS supplies non-ferrous castings and forgings to India and the rest of the world. Right from the initial stages of application engineering and design to manufacturing high-quality products in our facility, we offer end-to-end manufacturing services at competitive prices with precision and accuracy.

Our highly technical and advanced professional team can tailor the product to suit your individual requirements, whether you'd like standard or custom-engineered products.

We specialize in non-ferrous metals and non-ferrous casting and forging. Our robust construction techniques and technology, easy installation support, dimensional accuracy, and various quality processes make us the preferred suppliers of forging and casting components.

Over the last 8 years, we've changed our manufacturing processes and embraced new technologies to align with the constantly evolving customer needs. Today, we can supply foundry and forged products from many different alloys and top non-ferrous materials.

FACILITIES | TOOL ROOM

Over the years of our operations, IQS SYSTEMS has developed world-class capabilities and capacities for an excellent infrastructure. For the highest quality non-ferrous castings and forgings, we have a dedicated tool room at our manufacturing unit enables us to have complete control over the development process and minimize development lead-time for our clients.

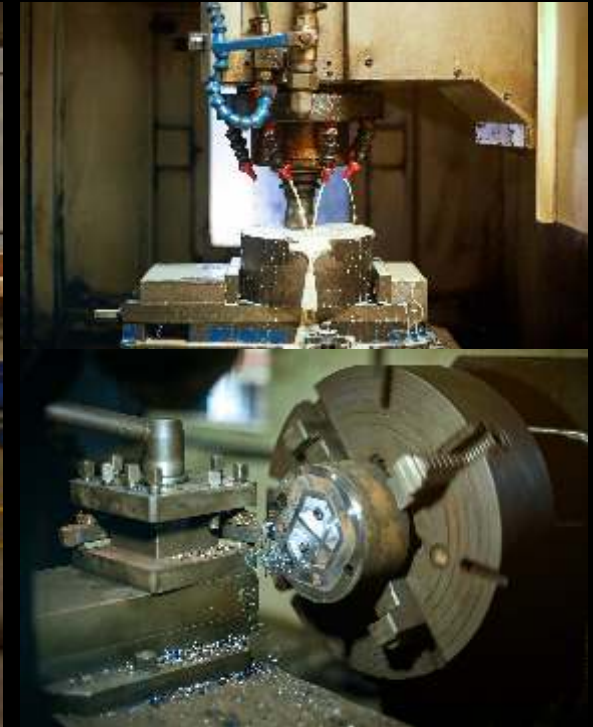

FACILITIES | FORGE SHOP

Our forging facilities include automated press liners of different capacities which are incredibly flexible. It allows us to meet different customer demands at the same time and optimize our production process. As a result, we're able to constantly exceed the growing customer demands.

FACILITIES | MACHINE SHOP

At IQS SYSTEMS, we host an array of conventional machines for grinding, turning, drilling, milling, and tapping machines to complete the fully finished non-ferrous castings and forgings to suit the customer requirements. We continually embrace new technologies and tools to help our machine shop stay updated for all current and future requirements.

FACILITIES | SUPPORTING & DESIGN FACILITIES

In order to ensure that external factors do not hamper the production, we augment our production facilities with supporting infrastructure such as Diesel Generator in case of electricity failure, 24*7 CCTV surveillance, Internet connectivity, Transportation and accommodation facilities for employees.

We have invested in creating an equally efficient back-office environment to ensure smooth operations at IQS SYSTEMS. Our Office Infrastructure Includes ERP System, Dedicated Accounts and Store keeping team, Purchase & Vendor Development Department, Quality Assurance, Conference Room with Audio – Visual Communication Facility.
